

BEST PRACTICE 1

1. Title of the practice:

Providing scholarship under three criteria

a. Single parent b. First graduate c.TMB scholarship

2. Objectives of the practice:

a. To empower the academic by removing the financial barrier.

b. To have at least a bachelor's degree.

3. The context:

Identifying and collecting the needed documents from the students within time was forcing us to make a lot of effort.

4. The practice:

The management of our college came forward to recognize the students of single parent and first graduate and provided scholarship to them. A serious effort was taken by the management with Tamilnadu Mercantile Bank to figure out economically backward 88 students by paying full fees for 3 years.

5. Evidence of success:

Post covid situation pull back the financial situation of the family not to send their girl children to higher education TMB voluntarily adopted 88 students to prolong their under graduation by crediting the fees amount in their personal account.

6. Problems Encounted and resources Required:

Through TMB We avail only 88 students for free education. The problem we encountered was we were not able to extend our hands to more number of needy students.

BEST PRACTICE II

1. Title of the practice: Celebration of National Science Day.

2. Objectives of the practice:

1. To be aware of advancement of science and Technology towards sustainable living.

2. A prolific campaign of ATAL Labs implemented to promote young student Innovators.

3. The Context:

The Department of physics organizes National science Day every year during the last week of February.

4. The Practice:

Celebration of National Science Day was usually initiated with Poster presentation competition and guest lecturers by eminent scientist regarding current advancement in Science and Technology . In this year 2022it is enhanced within prolific campaign of ATAL schools with the mentoring support by the faculties of Physics and Computer Science.

5. Evidence of Success:

Students:

Conveying science through proper channel without any false believes, generating new ideas about Technology, enhancing Research and Innovations and promotion of scientific temper among students make the society to overcome the energy crisis today without any health Hazards.

6. Problems encountered and resource required:

We have a thought that we could also indulge arts and Literature students to Participate and inculcate scientific temper within themselves in advancement of technology for sustainable living.

7. Notes:

Hence doing the Best practice in our Institution, we are marching towards sustainable Living with science and Technology.
